

Complete Thermal Solutions

Since 1991, JMC has established itself as a valued global business partner, supplying fans and complete thermal solutions, to OEMs around the world. Our reputation has been built through our meticulous commitment to providing engineered products, quality manufacturing and outstanding customer service.

At JMC, we know that it takes more than a reliable product to help our customers succeed in the fiercely competitive global marketplace. We work side-by-side with our OEM customers to deliver the optimal solution to their thermal requirements.

Who We Are

JMC is a leading manufacturer of thermal solutions with facilities around the world, offering a wide variety of products used by many multinational companies. JMC's product line features DC fans and DC blowers. In addition, JMC specializes in designing and manufacturing custom-designed thermal solutions.

JMC's Research and Development team leads the way in the new thermal technology. Our manufacturing facilities are certified to stringent international ISO 9002 and 14001 standards. In addition, all products are UL and TUV certified.

Around the world, the JMC team is highly trained in the art and practice of customer satisfaction. Experienced at working with: thermal, component, and mechanical design engineers, commodity managers, procurement engineers, and senior buyers and planners, our staff is ready, willing and able to service all levels within our customers' organizations.

Quality Statement

JMC is dedicated to identifying and understanding both customer and supplier requirements to provide services and products that meet or exceed the highest of expectations.

We are committed to developing and delivering reliable, quality products and services at a competitive price via:

- Exceptional response time
- A highly qualified in-house engineering team
- A thorough knowledge of our customers' needs and requirements
- The ability to be a complete thermal solutions provider
- ISO certified manufacturing and administrative operations
- A comprehensive and innovative product line
- Pioneering dependable, just-in-time delivery capabilities
- A dedicated team approach to 100% customer satisfaction

Philosophy

Our reputation as a reliable business partner, innovator and industry leader is a natural result of our business philosophy. We know that tomorrow's success does not rest on yesterday's achievements but on a constant commitment to improve our products, processes and service. Our employees' work as a flexible team to adapt to the ever-changing market we serve. JMC continually invests in the R&D of new products, technologies, and enhancements to its manufacturing and customer service systems. To keep the respect of current customers and earn new ones, JMC will always be the company that is "Easy to do Business With."

Expanding Facilities

As our OEM partnerships have grown, our capabilities have grown too. We have expanded by adding a state-of-the-art manufacturing facility in Dong Guang, China and expanding our application centers in Europe and Asia. These new sites are staffed with a highly trained workforce and the capacity to meet the tremendous volume requirements of our customers to ensure the highest quality.

Every facet of our business, from design engineering and production to on-time delivery, allows JMC to consistently exceed customer expectations.

Products

JMC offers a full array of DC fans and blowers designed to provide the longest life cycles, lowest noise and lightest weight. Sizes for DC fans range from 25mm-120mm and 80mm-172mm, respectively, with CFM ranges of 1-132 CFM and 16-242 CFM, respectively

JMC also offers a variety of flexibility to create and manufacture custom designs for your specific thermal requirements offering features such as: alarms, variable speed functionality, “intelligent” thermal technology, and more. Our products are ideally suited for a wide range of cooling requirements. Tried and proven in a variety of environments and industries, JMC Products work exceptionally well in personal computers, power supplies, servers, storage systems, networking equipment and enclosures in a variety of telecommunications, financial, medical and industrial applications.
